Title:	Dengue, diarrhoea make a comeback in Telangana			
Action By CSU, IDSP -NCDC	Information communicated to SSU- Telangana			

Diarrhoea and at least five dengue cases have been reported from the district as seasonal diseases have made a comeback, thanks to water stagnation and proliferation of mosquitoes. However, no case of Japanese Encephalitis has been registered so far.

Several private and public hospitals as well as primary health centres (PHCs) are brimming with patients, most of them being treated as outpatients. A handful have been admitted on doctors' advice. However, the issue of unavailability of adequate doctors and medicines continues to persist.

In Renjal mandal, where the PHC with eight villages under it sees an average of 85 patients coming in every day.

Save Water- Save Life, Save a tree- Don't print unless it's really necessary!
