Title:	150 Workers of iPhone Maker Foxconn India Factory Hospitalised After Food Poisoning in Chennai, Tamil Nadu			
Action By CSU, IDSP -NCDC	Information communicated to DSU – Chennai, SSU – Tamil Nadu			

More than 150 employees at a Foxconn India factory that makes iPhones for Apple Inc were hospitalised for food poisoning this week but almost all have now been discharged, the district government said on Saturday. "There was an outbreak of acute diarrhoeal disease reported among the Foxconn employees," the statement from the Thiruvallur district administration said.

It said 256 workers were treated as out-patients and 159 were hospitalised, of whom 155 have already been discharged.

Foxconn did not immediately respond to a request for comment.

It was not clear whether the incident would disrupt production at the plant in Sriperumbudur, which is on the outskirts of the southern city of Chennai. Most of the Taiwanese manufacturer's workers in India are women.

Save Water- Save Life, Save a tree- Don't print unless it's really necessary!
