<b>Title:</b>	<b>Rajasthan logs 2 dengue deaths as cases spiral</b>			
Action By CSU, IDSP -NCDC	Information communicated to SSU - Rajasthan			

Dengue cases in the state have increased by 72% between September 11 and September 20 as 867 more persons tested positive for the vector-borne disease in 10 days. The first two dengue deaths in Rajasthan have been reported from Dausa and Alwar during the same period.

Dengue cases in the state have suddenly increased from 1,205 to 2,072 during this period. The districts that are worst affected are Jaipur, Alwar, Bhilwara, Kota, Bikaner and Udaipur. Bikaner reported 139 cases, the highest so far, while Alwar reported 129, Bikaner (101), Kota (87), Udaipur (81) and Jaipur (76).

Hospitals across the state are witnessing increasing number of patients with viral fever and other seasonal diseases including dengue. Recently, the Centre has also alerted 11 states including Rajasthan on serotype II dengue.

A senior health department official said instructions had been issued across the state to take measures to prevent vector-borne ailments and seasonal diseases.

Since the rains have now prolonged spells, it has also increased the risk of vector-borne diseases. “We have been appealing to people to take proper precautions to ward off risks of getting infected with viral diseases including dengue, malaria and chikungunya. People should check in their neighbourhood and in their houses, also at the rooftops to ensure that water is not stagnant as the current conditions are favourable for breeding of mosquitoes,” said the official.

The health department has also issued directions to district collectors to ensure that fogging and other anti-larvea activities are taking place in their respective districts.

## VECTOR-BORNE DISEASE ON THE RISE

Arvind sharma
